EXPERIENCE

INNOVORG | FRONTEND DEVELOPER
Jan 2023 - Present | Canada

- Gained 2 years of practical experience in developing multiple web applications, utilizing React and Tailwind CSS.
- Collaborated with a team of 6 experienced developers, coordinating remotely through virtual communication tools.
- Demonstrated proficiency in working independently, completing 6 assigned tasks within set deadlines.

INNOVORG | WORDPRESS DEVELOPER
June 2022 - Present | Canada

- As a WordPress Developer, successfully managed and maintained the company's official WordPress website for 1.5 years.
- Engineered and implemented WordPress theme and 7+ plugins to improve website functionality.
- Collaborated with the marketing team to optimize the website for search engines, resulting in a 25 percent increase in website traffic and a 15 percent increase in user engagement.

FIVERR | WEB DEVELOPER
April 2021 - Present

- Freelance Web Developer with experience of 2.5 years on platforms like Fiverr and Upwork.
- Completed over 132 orders on Fiverr alone and achieved Level 2 seller status within 2 years.
- Areas of expertise include WordPress, Frontend development with React, and Web3.0 projects.

PERSONAL PROJECTS

CONCRETEIQ | REAL-TIME MONITORING WEB APPLICATION
Final Year Project

- As part of my final year project, I established a real-time monitoring web application using a Python backend and REST API, as well as a React frontend dashboard.
- The dashboard features a variety of visualizations such as graphs and charts to help users better understand the metrics being tracked.

SOCIOPEDIA | CRUD WEB APPLICATION
Nov 2022 - Present

- Developed Sociopedia, a full-stack social application, utilizing the MERN stack and Redux Toolkit for state management.
- Implemented 5 unique features including image uploading and social media integration.
- Implemented JWT web tokens for authentication and authorization, ensuring the security of user data.
